DANIEL PAREDES MENDOZA

Frontend Developer | Vue.js 3 | TypeScript | SaaS Applications

Moyobamba, San Martín, Perú | dannyslowgoswell@gmail.com | github.com/DanGosw | linkedin.com/in/daniel-paredes | dangosw.netlify.app

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building SPA-based SaaS applications with Vue.js 3, TypeScript, and Vite. Experienced in developing features for electronic invoicing, inventory management, point-of-sale (POS) systems, and business dashboards. Skilled in responsive interfaces, reusable components, REST API integration with Axios, and state management with Pinia. Contributed to frontend architecture decisions, production releases, and mentoring junior developers.

WORK EXPERIENCE

Frontend Developer

Jan 2023 — May 2026

Tecnologías para Soluciones Inteligentes (TSI)

- Developed and maintained SPA-based SaaS applications using Vue.js 3, TypeScript, and Vite.
- Implemented features for electronic invoicing, inventory management, POS systems, and business dashboards.
- Built responsive interfaces and reusable UI components with Tailwind CSS, PrimeVue, and Naive UI.
- Integrated REST APIs using Axios and managed application state with Pinia.
- Implemented form validation with VeeValidate for enterprise data-entry workflows.
- Contributed to frontend architecture decisions and initial project setup through production readiness.
- Investigated and resolved technical and functional issues throughout the application lifecycle.
- Mentored junior developers and interns on coding standards and frontend best practices.
- Worked in Agile environments using Scrum, Kanban, and GitLab for version control.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend framework: Vue.js 3

Routing and state management: Vue Router, Pinia

Build tools and package managers: Vite, npm, pnpm

Styling and UI component libraries: Tailwind CSS, PrimeVue, Naive UI, shadcn/vue

Forms and validation: VeeValidate

API integration and debugging: REST APIs, Axios, Postman

Version control and environment: Git, GitLab, Docker, Linux

Design and development tools: Figma, Visual Studio Code, WebStorm

Methods and practices: Scrum, Kanban, component-based architecture, responsive UI development

PROJECTS

Zenda Comercial & Zenda Pharma — ERP / Invoicing Systems

Frontend development of electronic invoicing, inventory, stock control, sales, and cash register reporting features for retail and pharmacy systems connected to SUNAT. Technologies: Vue.js 3, TypeScript, Tailwind CSS, PrimeVue, Naive UI, Pinia, Axios.

Verydis — Field Personnel Management

Frontend development of attendance tracking, Kanban-style task boards, and productivity dashboard features for a workforce management platform. Technologies: Vue.js 3, TypeScript, Tailwind CSS, PrimeVue, Naive UI, Pinia, Axios.

Flizzy — Restaurant POS System

Implementation of point-of-sale flows, role-based access control, waiter mode for order handling, and cash register reporting. Technologies: Vue.js 3, TypeScript, Tailwind CSS, PrimeVue, Naive UI, Pinia, Axios.

Biometric Tracker & JNICAMP Demo

Collaboration on a biometric management web application and on a frontend platform integrated with backend services.

EDUCATION

Computing and Informatics — 2020 — 2022

IESTP Carlos Salazar Romero

Program completed (egresado)

English — Level B2 (In Progress) — 2025 — Present

Centro de Idiomas El Cultural

LANGUAGES

Spanish — Native

English — B2 (currently studying)
